

Biennial Flight Review
Arrow Aviation LLC

The purpose of this written review is to ensure the pilot is familiar with the FAR's and air space requirements pertaining to the appropriate licenses and ratings. The information sought is not presumed to be complete, but is the minimum required for safe flight and may be obtained from "open book" sources. To be complete it must be understood and corrected to 100%. This review will remain on file with Arrow Aviation LLC but the renter can request a copy for his/her files.

1. If you receive your biennial flight review in full today, when will be the last day you may operate as PIC before receiving your next BFR?

2. When approaching to land at an airport without an operational control tower in Class G airspace, unless otherwise indicated, all traffic pattern turns will be made to the

3. Is a person allowed to operate under visual flight rules in Class A airspace?

4. Briefly define Class C airspace. (include boundaries, equipment required etc.)

5. Where is the nearest Class C airspace to DXR?

6. Briefly define Class B airspace. (include boundaries, equipment required etc.)

7. Briefly define Class D airspace.

8. Is Class D always in effect? Explain.

9. What is a "Special VFR Clearance"?

10. How does one obtain a "Special VFR Clearance"?

11. Explain minimum safe altitudes.

12. Explain the meaning of the following ATC light gun signals.

	Aircraft On Ground	Airborne Aircraft
Steady Green		
Flashing Green		
Steady Red		
Flashing Red		
Flashing White		
Alternate Red & Green		

13. Briefly define the following special use airspace.

Restricted – _____

Warning - _____

Prohibited – _____

Alert – _____

MOA – _____

14. When is a transponder required?

15. When is an ELT *NOT* required?

16. What are the basic VFR weather minimums?

Controlled Airspace –

Uncontrolled Airspace –

17. Explain minimum equipment requirements for the following:

Day VFR –

Night VFR –

18. Joe Pilot received a third class physical on July 17, 1999. What is the expiration date of that physical?

19. Explain the magenta and blue shaded areas on a sectional chart.

20. What are the dimensions of a victor airway?

21. What documents must be on board an aircraft to make it airworthy?

22. Does the airworthiness certificate expire?

23. What inspections are required to keep an aircraft airworthy?

24. Who is ultimately responsible for safe operation of an aircraft?

25. If a friend asks you to drop him off in Groton and offers to pay for the flight expenses, would the flight be legal?

Would it be within the parameters of your rental agreement?

What if you held a commercial license?

BONUS (true or false) - Under part 23 aircraft certification, a multiengine aircraft is required to show a positive rate of climb with one engine inoperative.
